PROFESSIONAL EXPERIENCE

Personal Live Portfolio

I created a personal live portfolio to showcase my skills, projects, and improve my chances of getting hired. Built using React.js, Node.js, and styled with Tailwind CSS, and deployed with a custom domain for public access.

Library Management System

Developed a system where users can create profiles and access books with borrowing time limits and real-time management features. Built using React.js, Django, Python, Bootstrap, and SQLite.

Online Quran Tutor Website

Developed an online learning platform where students can connect with tutors for Quran learning and schedule sessions easily. Built using React.js, Django, Python, and MySQL with a responsive and user-friendly interface

E-commerce Website

Developed a full-stack e-commerce platform where users can browse products, add items to cart, and complete orders with secure authentication. Built using React.js, Django, Python, and integrated database management using MySQL.
